
Aims

The central aim of Erasmus+ is to connect students spread all over Europe, but furthermore Erasmus+ aims...

- ... to provide opportunities for individuals to improve their skills, enhance their employability and gain cultural awareness
- ... to modernise education, training and youth work across Europe

Participants are able to spend a period of time in another participating country gaining valuable experience of life, study and work with the aim of increasing the opportunities available to them in the future

The Erasmus + Project

Erasmus+ is the European Union programme for education, training, youth and sport. It runs for seven years, from 2014 to 2020.

The Erasmus Plus programme is for everybody living in the EU. Erasmus Plus is represented in every country of the EU and helps people to get education their whole life. Furthermore Erasmus Plus wants people to learn more about other people living in the EU.

There are 6 education categories:

- Sport
- Youth in action
- Adult-education
- Job-education
- School-education
- University-education

Erasmus Plus

Erasmus+

THE EU PROGRAMME FOR EDUCATION,
TRAINING, YOUTH AND SPORT.

What do we have to do with the Erasmus Plus programme?

Our school offers an Erasmus Plus project for six students in the 12th grade. It's a two year project but our group will only be participating for one year. After that six new students will take over our project. But what exactly is our project?

This year our project is to develop and build an ecofriendly greenhouse. For this project we are working together with three different schools in Europe and every school takes care and is responsible for a different part of the ecofriendly greenhouse. Our aim is to have a functional ecofriendly greenhouse after the two years. But for now we are still at the beginning of brainstorming and planning. Every half year there will be a meeting with our partner-schools. Throughout the year we will communicate through Skype and emails to keep everybody updated about our progress and new ideas.

Our Partner-schools

Lycée Hippolyte Fontaine

The High School is located in Dijon, France and is a school offering general education and vocational education. Their good equipment, competent colleagues and the key teachers, that are involved in the projects, are experts in the field of electrical engineering which allows us to work in a multidisciplinary project. Furthermore they cooperate closely with their colleagues of the branches environmental technology and metal engineering.

Colegio La Salle Virgen Del Mar

This school is located in Almeria, Spain and is a school with a highly transversal profile offering general primary and secondary as well as vocational education. In the vocational field they are specialized in health as well as administration and finance. The Colegio La Salle Virgen Del Mar has a good location in the centre of Almeria. Almeria is known in Europe for 3000 hours of sunshine a year and their vegetables and fruit production.

Lycée Technique d'Ettelbruck

This school is located in Ettelbruck, Luxembourg and has 223 members of staff and about 1300 students. As a technical secondary school they offer a vast range of courses and training programmes. They have a general course of three years for students who come from primary education. After this course they offer 4 different sections: The commercial section, the technical and electro-technical section, traineeships in the metal section and studies in health and social section. At their school are many foreign students from a large variety of different countries. Integration and individual support are therefore key factors of their work. They especially focus on career guidance and vocational orientation.
